LUX BLACK

This new retractable Roll up has a replaceable cartridge to make the exchanging of the graphic easier. With its modern black Design and stability the Lux is perfect for all situations.

This Lux Roll Up features a "field-serviceable" graphics cartridge. Like other Roll Up banner stands, this banner stand, retracts the banner into the base when not in use. The difference is that this product offers an interchangeable graphic cartridge. In less than 5 minutes, your customer can change his trade show banner display to feature a new message. This offers your customer the possibility to buy several graphics and change them during an exhibition.

Pole in three parts

Pole can be stored in the base of the Roll Up

Adjustable tension
